PYTHON FULL STACK DEVELOPER

PROFESSIONAL SUMMARY

Detail-oriented Master of Computer Applications (MCA) professional with hands-on experience developing, optimizing, and maintaining full-stack Python web applications. Expert in designing robust REST APIs, constructing responsive user interfaces, and implementing efficient database query architectures. Proven capability in troubleshooting complex application bugs, conducting thorough code reviews, and deploying secure software solutions to cloud environments (AWS), supported by published IEEE research in edge-deployed machine learning systems.

TECHNICAL SKILLS

Python & Backend Web Dev: Python, Flask, REST API Development, SQLite, LangChain, FAISS, Troubleshooting & Debugging

Frontend Development: JavaScript (ES6+), HTML5, CSS3, Responsive Web UI Design, Human-Computer Interaction (HCI)

Cloud & Deployment: AWS (VPC, SageMaker, S3, Auto Scaling), Edge AI / Device Deployment, Cloud Practitioner (AWS)

Core Competencies: Data Structures & Algorithms, Database Query Optimization, Code Reviews, Agile Methodologies

EDUCATION

Master of Computer Applications (MCA)

Periyar Maniammai Institute of Science & Technology (PMIST), Thanjavur, Tamil Nadu

Expected 2026

Bachelor of Computer Applications (BCA)

A.V.V.M. Sri Pushpam College (AVVMSPC), Thanjavur, Tamil Nadu

April 2024

CERTIFICATIONS

Elite Certification in Human Computer Interaction (HCI)

NPTEL (IIT Delhi / IIT Madras)

April 2026

- Certified in designing highly intuitive, accessible, and responsive user interfaces, achieving a consolidated score of 87% (Elite Badge).

Cloud Practitioner (AWS)

ICT Academy

April 2025

- Validated proficiency in architecting, maintaining, and deploying scalable applications directly onto the AWS cloud ecosystem.

ACADEMIC & RESEARCH PROJECTS

DocuMind – Privacy-Preserving Legal Document Intelligence System

2025 – 2026

Repository: github.com/Ahmedmusthaffa/DocuMind_FYP

- Developed and maintained a full-stack, local AI-powered web application using Python and Flask integrated with a highly responsive JavaScript, HTML, and CSS frontend interface.
- Designed and developed REST APIs to process multi-format document uploads (PDF/DOCX), handle vector database chunking via FAISS, and generate asynchronous summaries using LLaMA 3.
- Optimized application performance and SQLite database queries, ensuring low-latency retrieval of secure personal document histories and prompt response times on local hosting.
- Conducted systematic troubleshooting and debugging of memory allocation limits, reducing computational overhead during concurrent text embeddings parsing.

EXPERIENCE & INTERNSHIPS

Cloud Architecting Intern

Dec 2025

ICT Academy

- Designed and configured scalable cloud architectures deploying web-tier infrastructure on AWS VPC, S3, and Auto Scaling.
- Created secure deployment blueprints and collaborated on technical project documentation aligning with Agile deployment cycles.
